CD6, p.414. Thomas Kennair, Delores Neeley, Oswald's literature distribution, pictures by WDSU and WWL

This seemingly negative report has value, aside from its additional confirmation of the Oswald helper and general conformity in his general description. It is strange that the FBI says Kennair "recognized" the other man without identifying him.

Aside from the WDSU film, there were pictures, this says, taken by WWL. This is both likely and of a certain potential importance. The WWL studios are close to the scene. WWL also operated official government propaganda broadcasts through its radio affiliate, under Dr. Isaac Casariego. This was a CIA operation. Were Oswald seeking to establish a CIA cover, the boradcast of his "pro-Castro" activities by WWL could have helped.
